Polytorx sells Helix into its 25th Country

Polytorx, LLC announced today the sale of Helix into its 25th country. Ecuador was recently added to the list of customer countries which now includes the US, Mexico, Canada, United Kingdom, Spain, China, India, Australia, New Zealand, South Africa, Guatemala, Costa Rica, Ecuador, Kuwait, Germany, Italy, Korea, France, Turkey, Sweden, Kenya, Singapore, United Arab Emirates, Taiwan and Jamaica.

Founder and CTO, Luke Pinkerton said, *“We are very pleased to see the awareness of Helix continue to grow globally and we look forward to the day when Helix becomes the standard for all concrete.”*

Helix are toothpick-sized, pieces of twisted wire used to replace rebar in the reinforcement of concrete. Originally developed because of its strength and crack resistant properties for earthquakes, Helix has been sold in virtually all uses of concrete. In all cases, Helix has exceeded customer expectations by lowering costs and providing stronger finished products.

Polytorx is located in Ann Arbor, Michigan and manufactures Helix in the USA with its own proprietary, high speed machines. More information can be found at www.helixfiber.com.
